Professional Summary

Results-driven AI Software Engineer with 4+ years of experience in full-stack engineering, cloud automation, and API integration. Expertise in architecting production-grade Generative AI, LLM orchestration, Agentic workflows, RAG, and NLP pipelines. Skilled in enterprise .NET ecosystems, Sitecore CMS platforms, and secure IAM/PAM infrastructure deployments. Proven track record of designing, scaling, and deploying robust AI and cloud solutions on modern infrastructure.

Technical Skills

AI, GenAI & NLP	Natural Language Processing (NLP), Generative AI (GenAI), Large Language Models (LLMs), Agentic AI Workflows, Prompt Engineering, RLHF Evaluation Frameworks, RAG Architectures
AI Frameworks & Tools	LangChain, LLM APIs (OpenAI, Azure OpenAI), Vector Search (Cosmos DB), FAISS
Languages	C# (.NET Core, ASP.NET MVC), Python, JavaScript, HTML, CSS, SSMS SQL
Frameworks & CMS	Angular (8–19), Entity Framework
Cloud & DevOps	Docker, Azure Functions, Azure Service Bus, Cosmos DB, Git, Jenkins (CI/CD / MLOps), Postman, Swagger

Professional Experience

ACL Digital — Software Engineer	Aug 2024 – Present
%I Architected full-stack modules with Agentic AI and LLM APIs for the TLK Device Configuration App (OnePortal) using .NET Core 8, Angular 18, EF, and MySQL globally.	
%I Implemented Reinforcement Learning from Human Feedback (RLHF) strategies and developed rigorous evaluation frameworks to optimize the accuracy, performance, and reliability of internal Generative AI and NLP applications.	
%I Engineered automated data validation and a secure end-to-end scanner implementation designed specifically for client-side Device Registration.	
Enmarq Technologies — Software Engineer	Aug 2022 – Aug 2024
%I Built serverless REST APIs, Azure Functions, and Azure Service Bus triggers utilizing Azure Cosmos DB (Vector Search data management) and SSMS SQL to power low-latency data ingestion pipelines for downstream NLP pipelines and Generative AI RAG architectures.	
%I Managed Git and Jenkins CI/CD and MLOps pipelines to ensure seamless version control, automated testing, model deployment, and continuous cloud environment operations.	
%I Spearheaded the automated deployment, building, and testing of BeyondTrust PAM and BeyondInsight for 6,000+ users under a strict 90-day timeline.	
%I Executed seamless sequential Sitecore CMS upgrades from v8.3 to 10.3, enhancing Content Hub and Experience Editor workflows.	
%I Developed complex SQL Stored Procedures for Managed Printing Systems to automate multi-stage data integrity alerts.	
Enmarq Technologies — Intern Associate	Feb 2022 – Jul 2022
%I Built automated Python and C# scheduled jobs to extract and clean Cosmos DB user data for analytics and AI workflows.	
%I Validated microservices endpoints across backend APIs using Postman and Swagger.	

Certifications & Education

%IMicrosoft Certified: Azure Fundamentals (AZ-900 / DP-900)	2024 - 2026
%IOracle Cloud Infrastructure (OCI): Generative AI / AI Foundation Certified	2023 - 2024
%IB.E. Graduate — KVG College of Engineering	Graduated 2019
